and Recreation

# WILDLIFE SPOTLIGHT

## RED-EARED SLIDER

### FUN FACTS

- They are omnivorous! When they are young, they tend to eat more animal foods. As they get older, they switch to a more plant-based diet.

- They are very abundant in Missouri.

- Females have larger shells than males.

**It is a little strange to see this turtle out, as it is getting very cold. However, it is possible for them to still breed in Autumn!**

\*Please do not handle the turtle as they can carry diseases, such as salmonella, and we also don't want to disturb it, unless it needs to be moved for safety.\*
